diverse and differing needs**

**working in partnership with
teachers, parents and children**

**building success oriented'
teaching strategies**

promoting personal well-being

We are a non-profit institution established and run by City of Cracow' Department of Education. Our mission is to provide a specialized and comprehensive mental health service to the children and families of Cracow Northwest (Krowdrza District). We also support teachers from educational institutions in enhancing the quality of learning and teaching (especially children with specific learning disabilities).

Our team members specialize in working with the school community. We employ psychologists, pedagogues, speech pathologists and career counselors. We are concerned with learning, behavior, social and emotional development. Each psychologist is assigned to a group of schools.

We offer a wide range of interventions:

- assessments
- consultations
- therapy
- mediations

Our follow-up services include:

- individual and group therapy
- family therapy
- speech and language therapy
- pedagogical therapy (Educational Kinesiology)
- neurofeedback therapy
- sensory integration therapy (Developmental Movement)
- support groups
- social skills trainings
- stress management trainings
- parenting courses
- career guidance

We organize trainings, seminars and conferences for health and education professionals as well as special events: a Day of Solidarity with Children with ADHD, a Day of Entrepreneurship, Educational Fair, a Day of Lifelong Learning and many others.

We work in coalition with social services, employment services and judicial system. Our initiatives are aimed to improve the coordination between the education and health sectors.

We help our clients in their quest for information and direction. We empower them to deal with their difficulties using their own strengths and resources.
